

# LEED 2009 rating systems deadline approaching

Per the US Green Building Council, the registration close date for all LEED 2009 v3 rating systems is October 30, 2016. The sunset date, or the last date projects can submit for certification under LEED v3, is June 2021.

All TMASF Connects member buildings must be registered under LEED EBOM v3 in order to achieve full LEED Alternative Transportation credits through the TMASF Connects membership survey process.

## Why register now?

TMASF Connects member buildings who register under the 2009 rating system prior to October 31 will still be allowed to use the TMASF survey results for their new certification or recertification submittal.

Projects registered under the new LEED v4 must now conduct a full building transportation survey in order to achieve the maximum 15 possible points.

Please contact us if you have any questions.

**Evaluate your LEED certification plans and register before the deadline date.**
