TMASF Connects operates from **244 California Street, Suite 204 in San Francisco**. We have a staff of four professionals and outsource a number of our functions for IT management, accounting, legal and some creative design. Our staff is professionally accomplished and dedicated to our mission. The TMASF Connects association is managed by senior staff members. The staff of four also features a full-time Program Director and Creative Designer/Marketing Associate with strong design expertise.

We are governed by an advisory board of directors who are professionals in property management and development. The TMASF Connects Board of Directors are an engaged, committed, and active advisory council who are commercial real estate professionals elected by the membership of the association.

Year-in-Review

TMASF Connects was reauthorized for both the Commute and Career Programs during the City and County of San Francisco (CCSF) Planning Commission Public Hearing on Thursday, March 4th, 2021. TMASF Connects programs are now authorized for a period of 10 years from 2021 – 2029 through Planning Commission Resolution 20867. The TMASF Connects Board of Directors, members and staff are committed to continue offering services without foreseeable disruptions through 2029. All staff members are continuing education and training to remain current with technology, versed in education and infrastructure issues and non-profit management.

The TMASF Connects Board of Directors remain active and committed to the membership. Our board of directors and staff maintained a consistent work and meeting schedule from remote locations. The association continues to be funded solely through collection of membership fees. TMASF Connects has never requested nor do we intend to request CCSF funding for our programs. We are pleased to report 100% membership renewal for 2021 as well as the addition of one new member building, 77 Federal Street. Please consult our membership roster.

This summary offers reports of both the TMASF Connects Commute and Career programs. These reports provide an overview of our efforts and responses to each of the requirements as identified in CCSF Planning Codes 163 for Commute and 164 for Career. These programs work in tandem to focus on trip reduction strategies and to reduce traffic congestion. The Commute program highlights and promotes alternatives to driving alone. The Career program helps San Francisco residents become competitive for local employment opportunities.

This report provides links to materials and information pieces we offered during 2021. We also simplified and further refined our website to increase ease of use.

In 2021, we hosted two townhall format meetings with the San Francisco County Transportation Agency (SFCTA) about their Downtown Congestion Pricing study. We also participated in the Caltrain Go Pass Donation Program, with more than 35 commuters from our member buildings now using their system. TMASF Connects added a quarterly piece, TMASF Connects of the Moment, that summarizes and reviews goals and campaigns for that time period relative to CCSF Planning requirements of our program.

Throughout this report, we provide links to governing documents. These include past commuter behavior surveys conducted by TMASF Connects and previous annual status reports. We also offer links to past CCSF Planning Commission Resolutions that have governed our efforts for more than 30 years.

The TMASF Connects Board of Directors, membership, and staff thank you for your consideration.
Q1 JANUARY - MARCH
Reauthorized for both the Commute and Career Programs from 2021-2029 during City and County of San Francisco Planning Commission Public Hearing on March 4, 2021

Q2 APRIL - JUNE
Convened members for first major virtual townhalls on topic of Downtown Congestion Pricing

Q3 JULY - SEPTEMBER
Participation in Caltrain Go Pass Donation Program

Q4 OCTOBER - DECEMBER

2021 CALENDAR

TMA SF CONNECTS

DECEMBER 2021
City and County of San Francisco Planning Commission Resolution Number 20867
Submitted on behalf of our members to document representative program efforts undertaken from January 2021 to December 2021
for compliance with City and County of San Francisco Planning Code Section 163

1. Schedule promotion and assistance activities throughout the year, to help keep commute issues in the minds of commuters and to provide ongoing assistance
   COVID-19 impacts, Transit Service Best Practices

The impacts of COVID-19 continued to dominate a majority of electronic communications focusing on remote work issues, navigating vaccination information, and maintaining relevance in the workplace. TMASF Connects developed and distributed more than 30 communication pieces. We also continued to provide information to our members about major traffic incidents, as well as any transportation service changes.

TMASF Connects conducted outreach on a variety of commuter topics. For the physical commuter we focused on best practices of transit providers to offer clean and safe commuting. We also shared this information with the entire remote membership to remind them of the reliability and ongoing viability of using public transportation services for an eventual return to an office.

As we enter 2022, TMASF Connects will continue to monitor the membership for opportunities to host commute assistance events virtually or in-person, as permitted.

2. Focus activities on education regarding commute options; assistance in selecting and learning to use the most appropriate commute options; and incentives to use the most efficient and appropriate options in the context of building or employee needs
   Emergency Resources, Member Communications, Caltrain Go Pass Donation Program

This year, TMASF Connects continued an electronic distribution for our annual emergency transit materials package to our members. We continue to encourage commuters to understand their transportation alternatives in the event of a disruption to their customary travel patterns. TMASF Connects continues to monitor commuter, member, and transportation opportunities to promote safe and efficient travel when possible. Member communications, such as our Transit Service Updates, are consistently updated, maintained, and distributed accordingly to educate about commute and remote work options.

TMASF Connects also participated in the Caltrain Go Pass Donation Program, with more than 35 commuters participating. We have detailed this effort in Program Requirement Number Three. TMASF Connects continues to offer and expand educational campaigns to promote telecommuting for both Commute and Career programs.
3. Ensure that activities are conducted at a level of effort that will assure contribution to gradual modal shift over time, such that past goals for overall downtown commute patterns, established by the Downtown Plan, may continue to be attained

TMASF Connects Communications, Efforts & Services,
Caltrain Go Pass Donation Program, SFCTA Congestion Pricing Study

TMASF Connects has a communications strategy of offering pieces on specific subjects. Planned topics included telecommuting, reduced transportation costs, and transportation system enhancements. The goal of these resource sheets is to educate our members about making smart commute choices.

We remain flexible and able to respond to topics as they develop. For example, we responded promptly as COVID-19 testing and vaccinations sites became available. As city-wide restrictions changed, we provided immediate notification to our members.

TMASF Connects provided Caltrain passes valid for free travel for up to one year on their system. Our partnership with the Caltrain Go Pass Donation Program allowed 35 participants access to their transit system. This program is the major campaign being launched by the transit provider to attract new and returning riders to their system.

During Q2 2021, TMASF Connects hosted two townhalls with the San Francisco County Transportation Authority (SFCTA) on the Downtown Congestion Pricing study, detailed in Program Requirement Number Four. The townhalls were followed up with a detailed FAQ sheet that summarized meeting findings.

4. Develop and implement activities that provide for targeting commute groups in order to produce the most effective marketing and education efforts, and if necessary, the most effective incentives to induce commute pattern change

TMASF Connects continued to offer targeted messaging to focus on a successful telecommuting or on-site working experience. As mentioned in Program Requirement Number Three, these resource sheets had topics that ranged from detailed COVID-19 vaccination information to Health and Safety on Transit. We continue to offer comprehensive resources and messaging to help commuters identify options to driving alone. We also issue TMASF Connects Alerts as disruptive conditions arise. Our theme of safety continues.
Factsheets and messaging campaigns are summarized in *TMASF Connects of the Moment*. This is a new quarterly update piece which allows members and CCSF Planning staff ease of access and review of current programs.

In 2021, we hosted two townhalls on the topic of *Downtown Congestion Pricing*, with project sponsor, San Francisco County Transportation Authority (SFCTA). These townhalls allowed property management staff of our membership to ask questions and learn more about the SFCTA’s Downtown Congestion Pricing study. More than 90% of our property management and owner representative members participated.

Our members are committed to prepare for a returning workforce. As commuters return to work, distribution of promotional items such as commute straps and hand sanitizer are being discussed. We assume that extensive community outreach will be required to reassure commuters about safely returning to the use of public transit services.

Looking ahead, remote workers will remain a key audience of the Commute program. Telecommuting remains a major subject for collaboration between Commute and Career programs.

The changing conditions of commute patterns and career development impacted by COVID-19 require us to keep our efforts fluid. As we approach 2022, we will continue to review and enhance our message development and delivery options.

5. **Monitor program effectiveness and progress at regular intervals**
   *Membership Retention & Expansion, TMASF Connects of the Moment, Continued Commitment*

TMASF Connects has defined our set of metrics for our membership. A performance metric system for TMASF Connects includes monitoring goals such as member retention, dedicated commitment by board and staff, and program expansion. TMASF Connects staffing and board of directors’ involvement continue to be stable and strong. During 2021, we were pleased to welcome an additional member building, *77 Federal*, a newly completed development by Aralon Properties, joined TMASF Connects during Q2.

We began developing a quarterly communication, *TMASF Connects of the Moment*, dedicated to summarizing and reviewing goals and campaigns of that respective quarter. This quarterly activity is important for a consistent approach to program monitoring.

We were thrilled to receive a ten-year authorization from CCSF Planning Department which further expresses our long-term commitment to offering responsive Commute and Career programs.
City and County of San Francisco Planning Commission Resolution Number 20867
Submitted on behalf of our members to document representative program efforts undertaken from
January 2021 to December 2021
for compliance with City and County of San Francisco Planning Code Section 164

1. To determine the number and nature of jobs that will become available as a result of added downtown office development
   Remote Work Conditions, Employment Trends Monitoring

TMASF Connects staff continues to monitor job creation data from the SF Chamber of Commerce, Workforce Investment Board, Employment Development Department, LinkedIn, and other sources during the COVID-19 pandemic. It remains difficult to assess the number and nature of jobs that are added to downtown office development as buildings remain largely vacant of tenants. Remote work continues to be the dominant method of employment in our member buildings.

In 2021, we were pleased to welcome one additional member building, 77 Federal, a new 55,000 square foot development by Aralon Properties. As tenants begin residency in the property, we look forward to working with their property management staff to promote job opportunities and continued education to its commuters.

The issue of hiring remote workers is a topic for research as we enter 2022. TMASF Connects continues to track unemployment and job creation information. The fluidity of numerous workforce locations is a challenge that we continue to address. We will continue to identify additional avenues to create effective programs and promote the availability of jobs in our member buildings.

2. To publicize to San Francisco residents the availability of those jobs
   Outreach, Promotion, & Website, Resource Sheets, TMASF Connects of the Moment

TMASF Connects employs social media, website, and direct e-mail member campaigns to publicize the availability of resources and opportunities for employment and workforce development. Our website design makes it easy to navigate and access the plethora of job search resources in our Career section. As the COVID-19 pandemic continues, many of our buildings continue to see low occupancy rates. We estimate that 85-90% people employed in our member buildings are working remotely.

TMASF Connects has developed resource sheets for employers and employees regarding resources available during the COVID-19 pandemic. Our goal is to give employees and jobseekers a sense of perseverance, resilience, and solidarity during the COVID-19 pandemic. Materials distributed reach these remote workers via property management team outreach to their building tenant contacts.
These efforts are summarized in *TMASF Connects of the Moment*, a quarterly communication piece that reviews the program efforts and progress during that timeframe. As local jobs become available and can be promoted, TMASF Connects will continue to promote and publicize these future opportunities.

3. **To work with local schools and job training programs to create a labor pool of San Francisco residents qualified to obtain jobs created by added downtown office development**

   *Spark SF*, 2021-2022 Scholarship program, Internship

TMASF Connects is committed to education and internships for the San Francisco’s students and workforce. As of this writing, TMASF Connects is working with *Spark SF* to determine the most effective way to engage with schools and job training programs. We plan to redirect a portion of our scholarship fund to support SFUSD’s *Pop-Up Community Libraries* for the spring semester or to pledge an additional commitment to *meals for school children*. TMASF Connects is also updating our scholarship program for the 2022 year.

Between Q2 and Q3 of 2021, TMASF Connects accepted our first virtual intern, Fatima Gomez. Ms. Gomez completed a two-month internship program with TMASF Connects, researching and developing factsheets for our members. This virtual internship also may serve as a case study on the viability of remote internships. This is a topic for research and development that we plan to share with the membership before the summer intern season begins next year.

4. **To work with employers in the building to encourage their hiring of qualified San Francisco residents**

   *Tenant Relations, Resource Sheets, Continuing Efforts*

TMASF Connects members receive informational mailings and resource guides that identify local job training and educational entities. These groups are helping to prepare San Francisco residents to be ready to enter the local workforce. In 2021, TMASF Connects crafted many resource sheets for employers and employees regarding resources available to them during the COVID-19 pandemic. Materials like the *Business and Online Etiquette Guide* was distributed to help employers and employees reorganize for remote work.

Looking ahead, TMASF Connects will continue to promote and showcase local programs that are helping to develop a competitive workforce of San Francisco residents. We are committed to performing additional research and study on who will be hiring and where. As tenants phase employees back to work in member buildings, TMASF Connects will be on the forefront of collecting information about hiring trends. This information will be used to refine future programs.
5. To carry out other activities determined by the Department of City Planning, or its
designee, to be reasonable and appropriate in meeting the purpose of this
requirement

Association Commitment

TMASF Connects has a 30-year history of working closely with City and County of San
Francisco (CCSF) departments and organizations on a variety of program efforts. This
partnership is essential to TMASF Connects effectiveness and is important to our
organization. Our members are actively engaged and supportive of the TMASF Connects
Career programs. We look forward to expanding and refining our programs.

As jobs become available in our member buildings, we will identify avenues to promote
the availability of those jobs to San Francisco residents.

In concert with the commitments made and expressed for our ten-year reauthorization,
we remain a loyal and committed partner to CCSF and other local groups promoting
workforce development, enhanced transportation options and a stronger community.
TMASF Connects is committed and available to working with the Department of City
Planning, or its designee, in activities deemed as reasonable and appropriate in meeting
the purpose of this requirement.
Challenging times continue to confront all of us.

The low occupancy rate of people physically working in member buildings continues. In November 2021, TMASF Connects conducted a membership-wide survey of membership occupancy. With more than 50% of all member buildings responding, and in light of the new Omicron variant, we estimate that less than 10% of the pre-COVID tenant population is currently working on-site on a given day. With such a low percentage of the population onsite, conducting valuable membership programming continues to be a challenge. As of this writing, conducting a credible association-wide survey of travel behavior appears to be unlikely for 2022.

We are planning to offer a robust set of programs to enhance remote working opportunities. Issues of maintaining relevance, finding a sense of community are two major issues for telecommuters. These issues tie to both the Commute and Career programs. Had this report been written in October 2021, the outlook for numbers of employees physically returning to work would have been significantly different from December 2021 with the rise of COVID-19’s Omicron variant.

We plan to offer continued education and promotional opportunities through both programs to keep telecommuting a viable and sustainable option. Looking ahead, we will place significant emphasis on workers that have been or will be returning to their office buildings. We have a roster of potential programs and services for returning workers while we will continue tailoring information to our remote workforce.

Continuing efforts from 2021 will include participation in the Caltrain Go Pass Donation Program. We intend to continue working with SFCTA on their Congestion Pricing Study and promoting Spark SF* programs for SFUSD students. In 2022, we will be expanding programs to encourage confidence in using the public transportation systems and reminder campaigns about the viability of using alternatives to driving alone.

As stated during the March 4, 2021 CCSF Planning Commission hearing, we monitor current events and changes in building population to create meaningful, relevant and topical assistance.

We remain committed to using membership fees to fund our programs and do not anticipate any request for public funding or assistance. The TMASF Connects programs have been 100% privately funded since 1991. We are a committed partner to CCSF Planning Department.

We continue to work with CCSF Planning and other entities as needed or possible. We share common civic goals and commitments for expanded local employment and reduced reliance on single occupant commute trips.

Creative measures will continue to be researched, refined, and implemented as we move forward.
